The universal angiography system for routine procedures

Advance Registration: ~ April 7, 2017

To meet the rising demand for minimally invasive procedures world-wide, physicians need cost-efficient imaging systems allowing to cover a broad spectrum of routine cardiac and vascular procedures.

Our new universal angiography system Artis one marks a new approach to interventional imaging. It offers uncompromised imaging by combining state-of-the-art technology like the MEGALIX Cat Plus X-ray tube featuring unique flat emitter technology, with next-generation tools like CLEARstent Live for real-time stent enhancement. The system allows optimal patient access during all procedures and comes with a new user interface, allowing you to interact with the system in a completely new, intuitive way. That way, your attention can stay where you need it.

Because Artis one is easy to operate, also rotating teams can get up to speed quickly. And by offering dedicated tools for all your everyday challenges, Artis one supports you in broadening your procedure mix and will have a positive impact on your entire organization.

Meet a system that is designed differently.
